

Professor Martin Goosey

PhD. C.Sci. C.Chem. FRSC FIMMM FInstCT

Currently Industrial Director of Loughborough University's Innovative Electronics Manufacturing Research Centre (IeMRC), Professor Martin Goosey has over 30 years experience in the electronics industry including 15 years in various roles at Plessey's Allen Clark Research Centre and 3 years at the Morton Chemical Research Centre in the USA.

A specialist in materials and environmental aspects of electronics interconnection, assembly and packaging, Goosey was for 15 years Chief Scientist and Technology Fellow at Rohm and Haas Electronic Materials' European Technical Centre in Coventry. He has worked with various UK Government organisations including the DTI's Electronics Innovation Growth Team, the TSB, DEFRA, Envirowise, and with the Institute of Materials as a member of the Defence and Aerospace Foresight Panel, which produced the '*Electronic Materials for Defence and Aerospace*' report. Goosey is currently a Council member of the Institute of Circuit Technology.
