

Dr. Paul Goodman

Senior Materials Consultant, Reliability and Failure Analysis Group.
ERA / Cobham Technology Ltd.

Dr Paul Goodman provides consultancy on the EU WEEE and RoHS directives and is assisting a growing number of clients to deal with the implications of the legislation. Paul led an investigation into compliance issues with the RoHS directive for the UK Business Information Service (BIS) formally Department of Trade and Industry on behalf of the RoHS Technical Adaptation Committee.

Dr Goodman regularly advises the UK BIS on issues relating to electrical equipment and legislation. Dr Goodman carried out an investigation into exemptions to the RoHS directive for the European Commission in 2004 and has completed a review of categories 8 and 9 for possible future inclusion in the scope of the RoHS directive. Dr Goodman has carried out in depth investigations into aspects of the electronics business including equipment recycling, new technology, telecommunications and IT for specific clients. Dr Goodman has also written detailed reports on soldering, MEMS, connectors and contacts and the applications and markets for gold in electronics.
